For Each new customer, we pledge to plan a tree

About Vizitor

- Vizitor is a leading provider of front-desk solutions, Founded **4 years** ago
- Serving over **200+** organizations in 25 countries
- Trusted by **top** companies and **government** organizations
- Focuses on **security** and data protection with a smart and secure solution
- **Highly customizable** & feature rich product to meet specific industry needs
- Customer satisfaction is at the heart of Vizitor, with a **dedicated support** team available to ensure successful implementation
- **Join** a growing community of businesses that trust Vizitor for their visitor management needs.

“Story – Vizitor was born from a personal experience that resulted in time-consuming repetitive data entry & poor experience every time I visited an organization.”

Clients

"Best Digital Registrar"

Pros: Ease of use , best Digital Registrar for visitors

"User friendly software"

Overall: Prompt issue resolution and user friendly

Pros: Ability to link more than one device to the software.

"Great sign in software "

Overall: I own a Martial Arts studio and needed a better way to keep track of "walk ins" . Now they can actually leave the basic information needed to reach back as well as a SIGNED WAIVER to get back to training. Perfect because I can customize and add any FORM to be signed by visitor. Also works wonders when set on KIOSK on an event! Very reasonable cost

"The best solution for your visitor management project"

Overall: I have emailed support a few times and they are always very quick to implement features I ask for.

Pros: The price is very affordable, and the software is incredibly versatile. You can customize almost any feature in the software and the default features are great.

"You will not be disappointed"

Overall: Fast response time to questions. Great value for the money.

Pros: It was easy to implement, and easy to train people to use. Reports are easy to run, clear to read and can be done real time. I like the simplicity of the software.

Problem

- Maintaining visitor's data on logbook is hard/impossible for businesses (centralise data -> contact tracing -> saves time)
- **Security risk** of unauthorized access and fake identity
- Poor visitor experience, **Long wait times** to check in
- **Lack of compliance** with various regulations
- **No reporting** & analytics capabilities

Did you Know?

48%

of the visitors have had a bad experience at reception lobbies.

60%

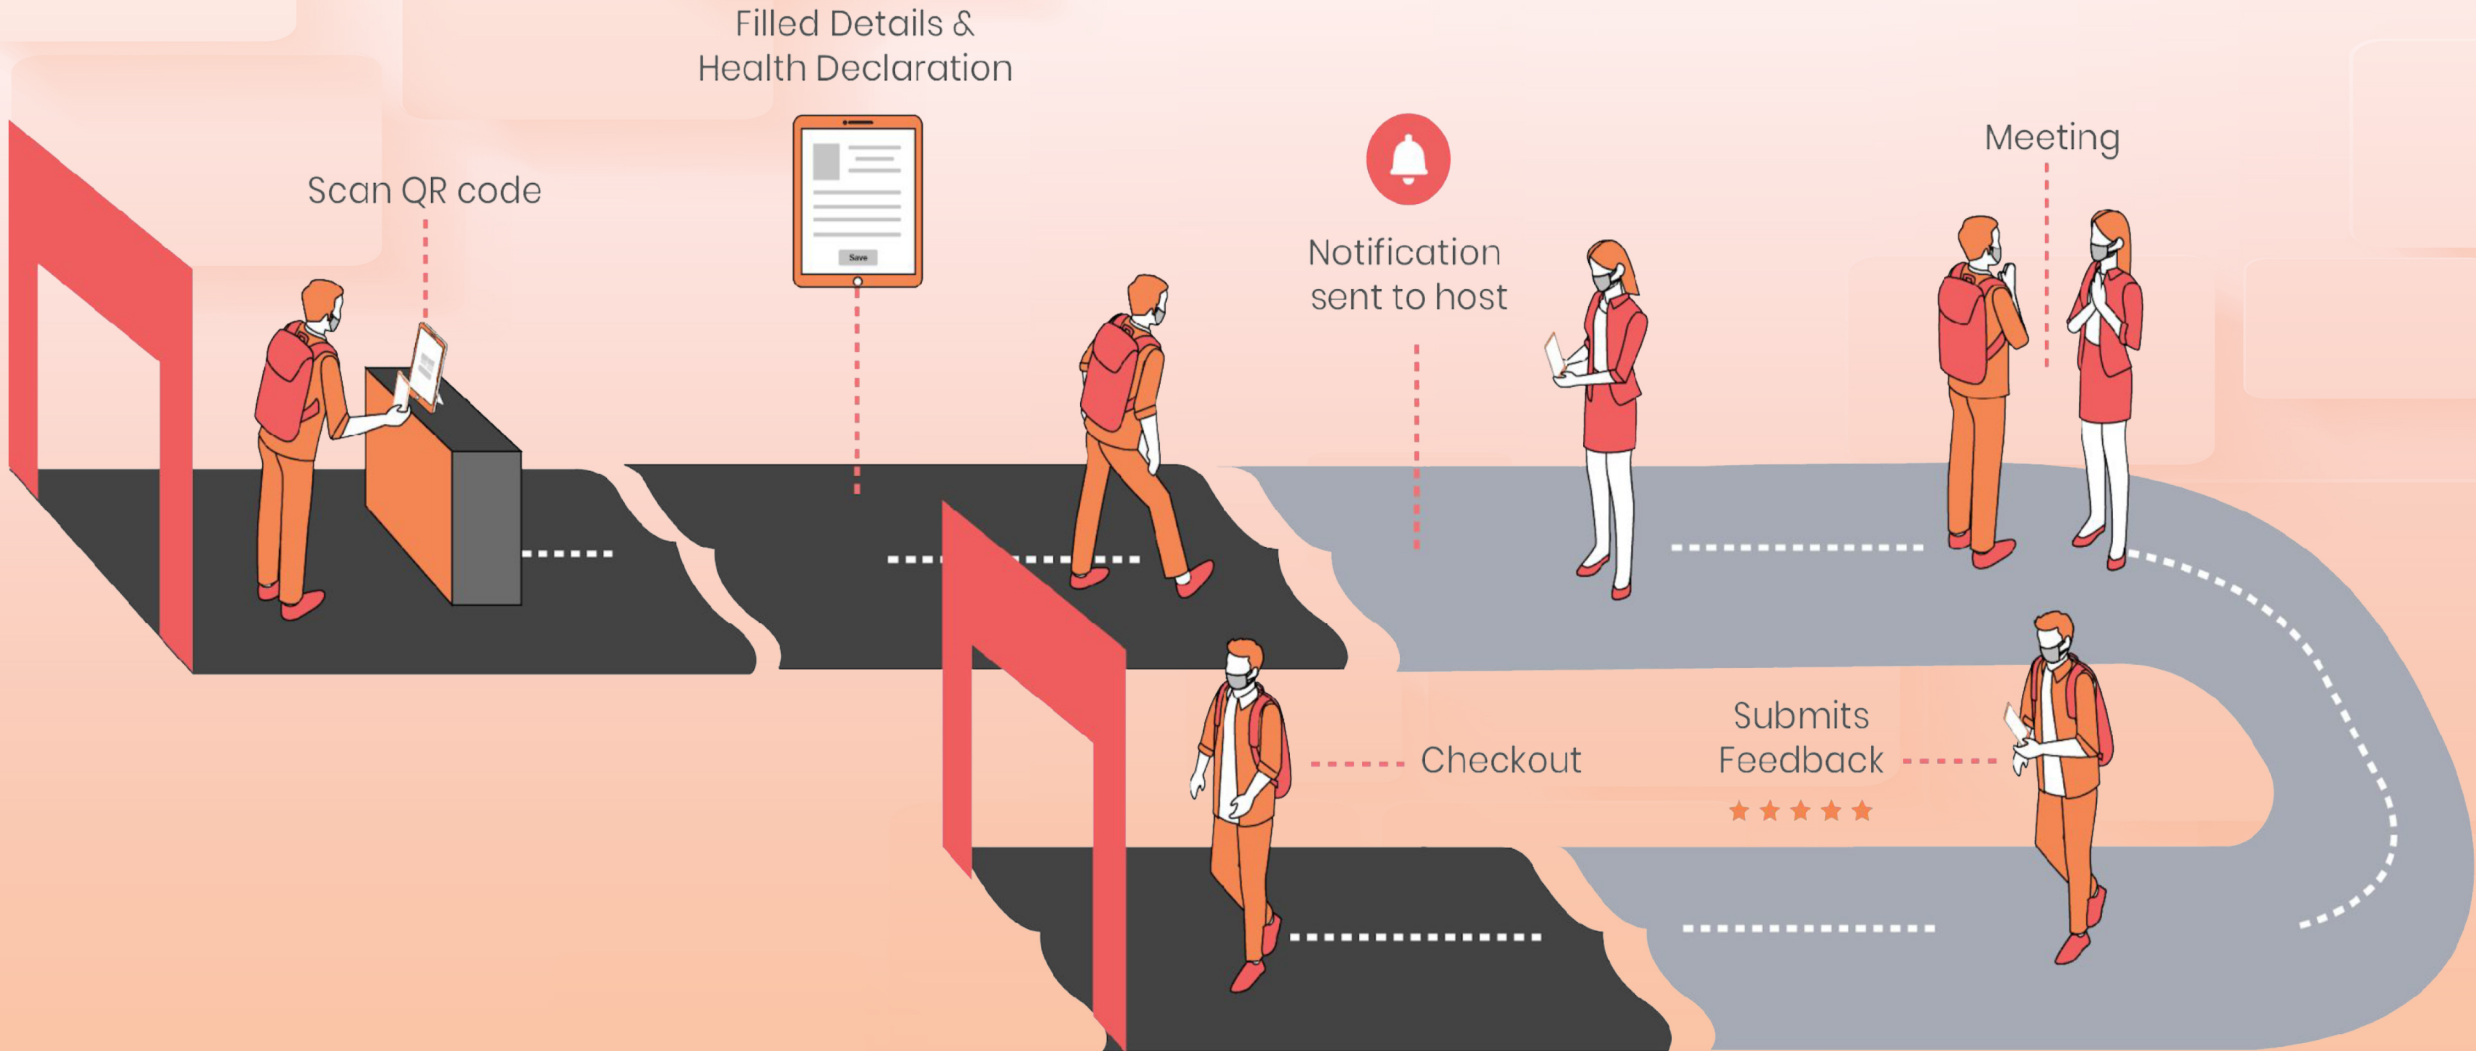

of meeting delays is due to long queues

80%

of are uncomfortable with level of security within the office premises

How it Works?

Our Product

Front-desk App

Case Study

Problem

Managing this high volume of visitors and maintaining a record of their check-in & check-out times was becoming a major challenge for Snapdeal's security and administrative staff.

Solution

Snapdeal partnered with Vizitor to streamline their visitor management system and create a better experience for their visitors.

Result

- Faster check-ins for visitors
- Reduced wait times and improved visitor experience
- Enhanced security and compliance with security protocols

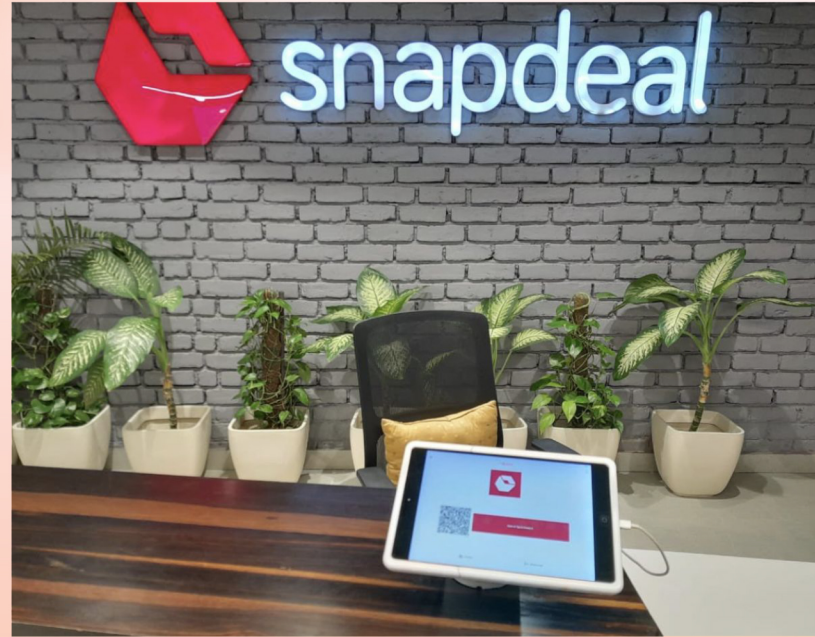

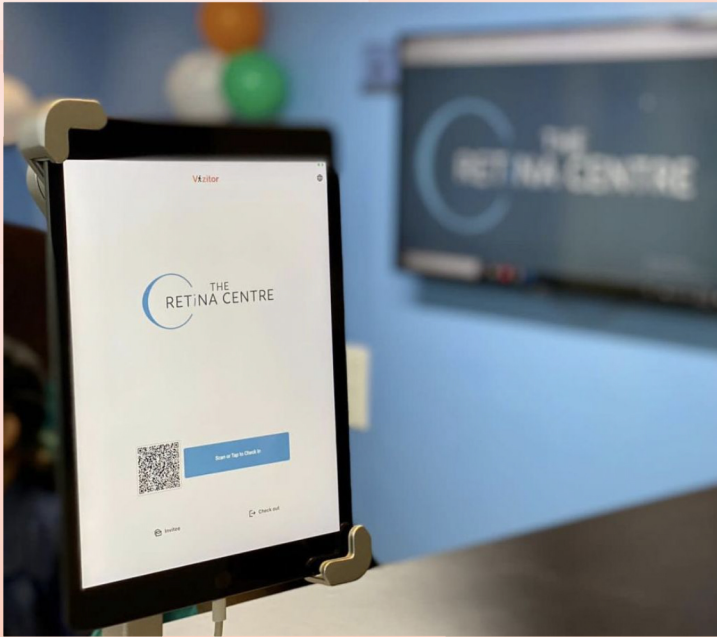

“Vizitor has enabled Snapdeal to create a safer and more efficient workplace, while improving the overall visitor experience”
